MigEZ

Making Your Data Migration Journey Easy

kastech
KNOWLEDGE IS OUR STRENGTH

MigEZ, short for Migration Made Easy, is the newest offering by Kastech for enterprise software applications and mission-critical data migration projects. Designed by highly skilled Data Migration Experts, this robust and formidable tool has been developed to enable the automated migration of data. Standing true to its name, MigEZ allows functional users with minimal technical knowledge to carry out Data Migration with ease. It is easily customizable for any source or target system.

WHY MigEZ

MigEZ positions itself as the Premier Solution for Data Migration and Integration by successfully helping organizations transform their overall data value while giving them fast and effective solutions that fit every bill. It combines data conversion and migration with enterprise-class functionalities such as version control, change data management, and parallel scalability.

- Takes away the heavy dependency on ETL Developers to complete migration process
- Puts across a simple UI for users to check and validate data migration at multiple levels
- Provides multiple dashboards to monitor both, migration process as well as scheduled jobs
- Can write data into multiple formats like flat files or database tables or data warehouses
- Channelize maximum efforts to ensure business needs are met while minimizing ETL development efforts

6 Key Features

1. END-TO-END DATA MIGRATION
2. LEGACY DATA MAPPING PROVISIONS
3. DATA PREPARATION & VALIDATION MADE EASY

BENEFITS

Time Saving: Hand-coded initiatives are often time-consuming and error-prone but MigEZ has been intelligently programmed to utilize all predefined templates. This helps in easy process automation, thereby saving organizations and their staff a significant amount of time.

Cost Reduction: MigEZ is capable of bringing down the overall estimated migration cost by a whopping 40% simply by using predefined processes and proven designs. Time is Money!

Data Sampling: MigEZ allows users to clean and prepare data through a simple UI to add different rules and transformations. It also allows for data validation at every step, ensuring data is in the exact required format thus avoiding any issues at later stages of migration.

Ready-to-Use: MigEZ has built-in functionalities for data mapping and data transformation that allows the smooth movement of data across applications in just a few simple steps.

Data Quality Management: MigEZ provides a dedicated data quality management module, enabling the seamless tracking and reporting of quality issues that might arise from the migration activity.

4 DATA CLEANSING

5 HANDLING LARGE VOLUMES OF DATA

6 USER-FRIENDLY DASHBOARD
