KNOWLEDGE IS OUR STRENGTH

Data Cube

Data Analytics as a Service

One-stop cloud based platform for all your data analytical needs

The astronomical amount of money spent by organizations in parsing massive datasets to obtain actionable insights has led to the advent of the concept of "data analytics as a service" provided through a cloud-based delivery model. Kastech's Data Cube is an extensible cloud-based platform that comes with various easily configurable tools for data analytics to efficiently process and analyze huge volumes of heterogeneous data.

Data Cube is a cost-effective and simpler alternative to traditional licensed and on-premise data analytics solutions.

How do you get started?

1. Sign up for Kastech's Data Cube
2. Connect your data to Data Cube platform
3. Start leveraging the platform

Core Features

- Data Acquisition to Visualization & Interaction
- Analytical Apps generating concrete data analytic workflows
- Simple Descriptive Analytics, Complex Predictive and Prescriptive Analytics
- Easily Integrates with External Data Sources
- End user driven – Data Visualization, Reporting and Interaction
- From single view of data to 360-degree view
- Easily Configurable and Extensible
- Works with a variety of Industries and Use Cases

Business Value

- Zero cost on infrastructure or maintaining in-house team of data scientists & engineers
- Affordable and quick access to advanced analytical capabilities
- Supports data analytical needs of an organization at different stages of growth
- Agility due to unified data models, transparency, and simplicity of the process
- Flexible to meet the specific needs of data owners & decision makers for clear insights and reports
