KNOWLEDGE IS OUR STRENGTH

Oracle Overview

Kastech is business strategy partner that provides IT Optimization services for innovative organizations. Our mission is to provide agile, scalable solutions and products that power technology and drive your business forward.

Trust – We build meaningful relationships with our clients to become a trusted partner and extension for support.

Expertise – We maintain expertise not only in Technology and Execution, but also in specific Industries, ensuring our solutions address broader business concerns.

Cost-Efficiency – We employ a Global Delivery model that blends our domestic PMO with remote development centers to create a lower total cost of ownership for our clients.

Kastech employs an enhanced Global Delivery Model that combines practical global operations expertise with comprehensive business acumen, offering 24*7 support for the distributed work environment

Robust domestic Project Management Office (PMO)

Expertise in deploying resources onsite while utilizing remote support to optimize cost

Development and support centers in Chennai and Bangalore, with partner centers in Japan and Dubai

High value delivery with shorter cycle time

Over 150 IT professionals worldwide

An Oracle Partner, Kastech, LLC specializes in solutions across enterprise, including Oracle Applications (e-Business Suite), Oracle Middleware, Oracle Database, Oracle Cloud, and Oracle Business Intelligence and Analytics.

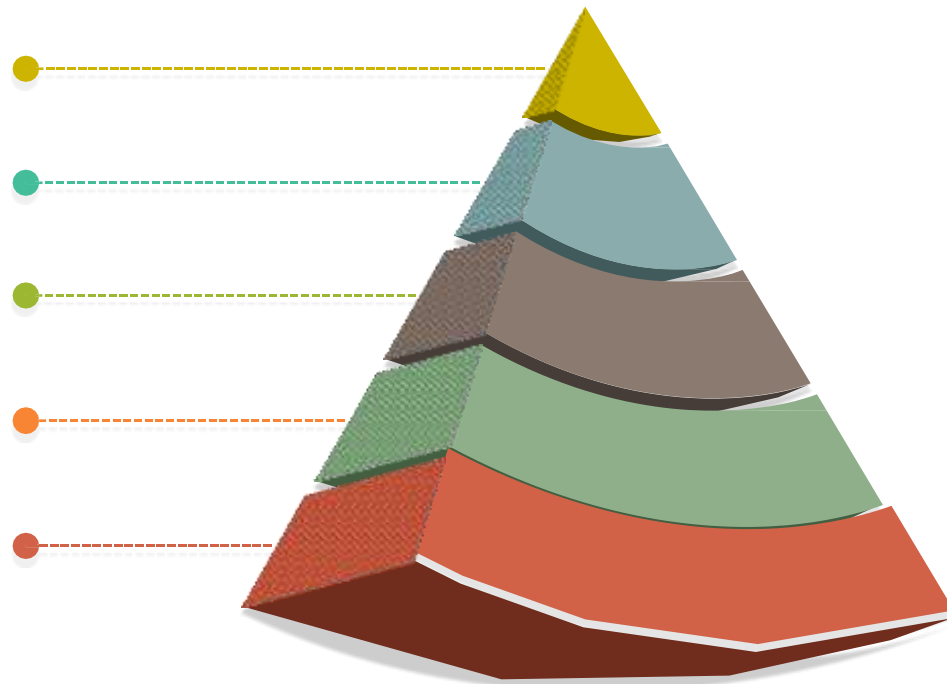

Oracle, MySQL, Oracle NoSQL Database, and Oracle Cloud implementations

Oracle E-Business Suite implementations and upgrades for Financials, Procure to Pay, Order to Cash, and Human Resources

Oracle Business intelligence and analytics using OBIEE and BI Publisher

Oracle Fusion Middleware implementations with Application Grid, Application Server, SOA Suite, and Portal

Java, Java Frameworks, and APEX application development

Core Competencies

Oracle Application & Database Lifecycle Services

PRE- IMPLEMENTATION

- Solution Roadmap & Strategy
- Planning
- Gap Analysis
- Assessment Services:
Product
Implementation Improvement
Version Migration

UPGRADES & MIGRATION

- Upgrades
- Platform Migration
- Re-Implementation
- ERP Migration

VALUE ADDED SRVICES

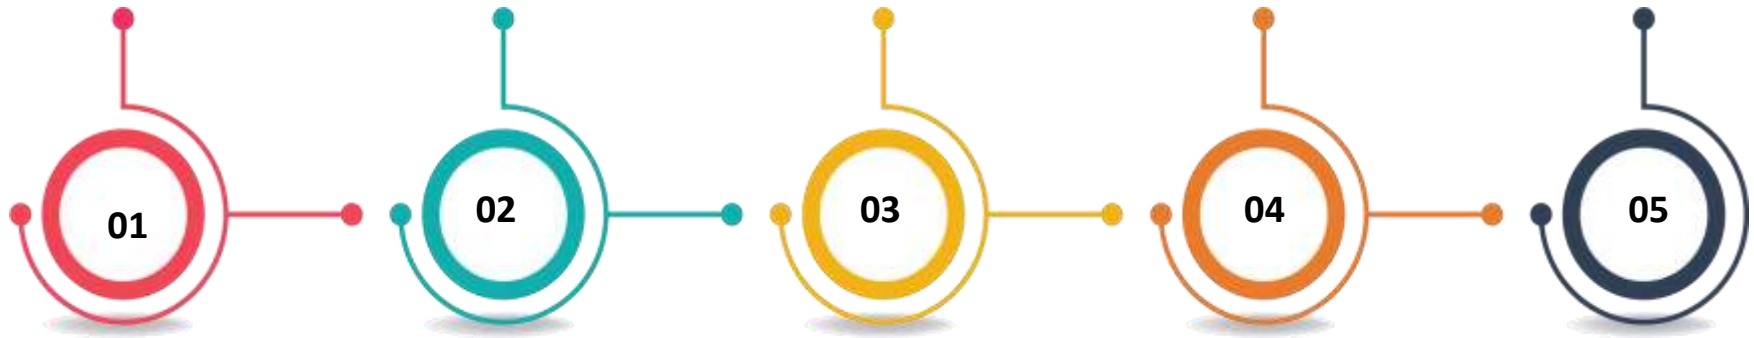

- Testing Services
- Additional End User training
- Improvement Assessment

IMPLEMENTATION

- Core Implementation
- End To End Project management
- Customization
- Data Conversion
- Integration with 3rd Party Products
- Key User Training

MANGED SERVICES:24/7 SUPPORT

- Application support & bug fixing
- DBA support/Administration
- Help desk support based on SLA
- L1 & L2 support
- Monitoring and Troubleshooting
- Performance analysis & tuning
- Data analysis and reporting
- Recommendations addressing your Future business requirements

Kastech's Full Lifecycle Services provide comprehensive, expert support for both hosted and Oracle Cloud environments. We leverage our expertise and Global Delivery Model to ensure that projects are delivered on-time and on-budget. We offer service activities from applications and the underlying infrastructure to databases, servers, and the network to ensure a seamless, gap-free coverage for your infrastructure.

Challenge : Southwestern Energy needed to implement a new ERP across departments and to replace their existing system. They engaged Kstech to implement Enterprise Upstream, as well as integrate it with TEL and Oracle EBS. VG also architected more robust reporting and solutions for management and operations, while scaling team size and utilizing an onsite/remote delivery model according to project requirements, allowing our team to perform the work at 30% of the cost of a traditional delivery model.

Results : The implementation in Joint Venture Accounting (Finance), Production Management, Revenue/Settlement, and Partner Balancing (Operations) departments resulted in huge cost savings throughout the company. Both TEL and EBS Integrations and Reporting were SLA compliant and on budget. VG continues to provide production support through global delivery model.

Technology Stack: Oracle eBS R12, Enterprise Upstream (JVA, Production, Settlement, Partner Balancing), TEL & EBS Integrations, Informatica, OAF

Duration: 2011 to Current

Project ROI: Blended model saved \$8.9 million in project deliver costs

Client Challenge : After their IT Operations shifted from the Middle East to India, Petrofac UK, a leading oilfield service company, needed to become more proactive in their enterprise and contracted VG to support their Oracle EBS infrastructure. In order to keep pace with increasing globalization, they also contracted VG to develop extensions for their Oracle systems and implement Golden Gate.

Results : VG provided DBA support, applied patches, monitored day-to-day activities, and enhanced performance for the overall infrastructure. For the extensions, VG analyzed and designed 5 custom modules and, using Oracle Application Framework, created 210 Reports, 16 conversions, 20 interfaces, and 10 workflows

Technology Stack: Oracle EBS R12 (INV, PIM PO, EDI, OM, FIN, WMS) OAF, OBIEE, JDeveloper / Apex/ Forms/ Reports, Oracle EBS, IBM AIX, Oracle Golden Gate

Duration: 2.5 years per project

Client Challenge: Noble Energy engaged Kastech to build a web-based interface to Oracle E-business suite to interface GL Forms with the FileNet web service in order to better enable Enterprise Asset Management. This custom interface would store files and get back the URL of these files to Oracle forms. To achieve Noble's goals, VG incorporated interfacing different software elements, implementing customizations and extensions for EAM, and upgrading Oracle to Release 12.

Results: The Oracle GL to FileNet integration was extremely successful, saving the company \$3.2 million in operational cost. Noble is now looking to expand this support to additional modules. VG has supported the functionality of all interfaces, including Oracle R12.

Technology Stack: OAF, PI/SQL Java, Workflow, Reports, Bi Publisher, Unix Scripting, webADI, FileNet, Oracle Forms, Oracle Reports, BPEL, Oracle Application Express, VisualStudio

Duration: Project completed within 4 months

ROI: \$3.2 Million in operational cost-savings

Client Challenge: During a merger, Golfsmith needed to ensure a seamless integration of 2 disparate IT systems to support the new company. Kastech was contracted to provide Oracle EBS, SOA, and .NET Developers, as well as 24*7 DBA and administrative support to uphold aggressive timelines.

Results: The configuration of Oracle EBS for multiple operating units, languages, and currencies and the introduction of SOA successfully integrated US and Canadian operations. They are currently supported by a single set of backend systems. The blended delivery model provided Golfsmith with an initial development savings of \$450,000 for the project, as well as an annual savings of \$150,000 per year for DBA support.

Technology Stack: Oracle EBS R12 (INV, PIM PO, EDI, OM, FIN, WMS) with custom extensions, Custom .NET/SQL Server POS (US), Retail Pro POS (CA), Custom PHP website (US), Able Commerce website (CA), Oracle SOA Suite and Microsoft SQL server replication for integration

Duration: 5 Years

ROI: \$450,000 in savings for project delivery, and \$150,000 per year in DBA support
