

ONLINE ADMISSIONS APPLICATION PORTAL (OAAP)

Manage your online admissions
applications more efficiently

POWERED BY – Student centric design and usability

KTech's OAAP is a comprehensive digital transformation solution that we designed for the higher educational entities to manage their **online admissions application software** efficiently – resulting in higher student enrollments and retention.

We follow **OWASP** guidelines for application Development.

BUSINESS VALUE

- 👍 80-90% FASTER COMPLETION OF ONLINE APPLICATIONS
- 👍 80% FASTER PROCESSING OF APPLICATIONS
- 👍 HIGHER STUDENT ENROLLMENTS RETENTION
- 👍 INCREASE IN APPLICATION COMPLETION

Our online admissions application software combined with rapid deployment and managed support services.

A robust application enabling you to manage your complete student admission process.

Addresses the following challenges with university/college admission process.

- No standard online admissions application system
- Our online admissions application software streamlines the admissions process.
- Confusion in process navigation, especially for non-native English applicants
- Lengthy application processing time—near-zero automation with excessive paperwork
- Admission staff spends excessive time on offline emails and phone calls from applicants
- Poor user experience for both online applicants and admission staff
